

# Indiana Medicaid Statewide Uniform Preferred Drug List (SUPDL)

## OptumRx Call Center

For prior authorization requests, claims processing issues or questions about the SUPDL, please contact OptumRx at 855-577-6317

Or fax the prior authorization requests to 855-577-6384

## Indiana Health Coverage Programs (IHCP) Drug Coverage

In accordance with 405 IAC 5-24, the IHCP covers all FDA-approved legend drugs with the exception of the following:

- Drugs designated by Centers for Medicare and Medicaid Services (CMS, formerly HCFA) as “less than effective” (DESI), or identical, related, or similar to a DESI drug
- Anorectics or any agent used to promote weight loss
- Topical minoxidil preparations
- Fertility enhancement drugs
- Drugs used primarily or solely for cosmetic purposes

**Note:** Inclusion of, or reference to, any given drug does not indicate market availability of the drug. Drugs that will be or have been withdrawn from the market will be removed from the SUPDL as part of routine periodic updating of the SUPDL.

## Nomenclature

- **Statewide Uniform Preferred Drug List (SUPDL)** - a list of drugs within select therapeutic drug classes, developed and maintained by the Drug Utilization Review (DUR) Board, designated as *preferred* or *non-preferred* based upon clinical and financial considerations.
  - **Preferred Drug** – Covered drug designated by the DUR Board as a principle agent for use within a therapeutic class.
    - Mental health drugs are considered *preferred* (see Mental Health Drugs section below).
  - **Non-preferred Drug** – Covered drug designated by the DUR Board as secondary agent for use within a therapeutic class. Non-preferred drugs typically require prior authorization.
    - Legacy continuation of therapy - The process whereby criteria are established exempting a drug from prior authorization, under specific conditions, when it would otherwise require prior authorization.
    - Brand name drugs, with an available substitutable generic, are *non-preferred* unless otherwise specified on the SUPDL. All preferred brand products on the SUPDL with a new available generic will list the generic agent added as non-preferred until it is financially advantageous to move to preferred. Once the generic agent is financially advantageous, it will replace the brand product as preferred. All non-preferred brand products on the SUPDL with a new available generic will list the generic agent added as non-preferred until it is reviewed by the Therapeutics Committee in the product’s regularly scheduled review cycle.
      - Prior authorization is typically required for a prescriber's specification of "brand medically necessary".

### Effective August 1, 2023 V1.1

Inclusion or reference to any given drug does not indicate market availability of the drug. Drugs that will be, or have been, withdrawn from the market will be removed from the SUPDL as part of routine periodic updating of the SUPDL.

- Certain drugs, sometimes referred to as “narrow therapeutic index” drugs, are exempt from the requirement of prior authorization for “brand medically necessary”; see information in the Pharmacy Services Module found at this link:  
<https://www.in.gov/medicaid/files/pharmacy%20services.pdf>
- **Status Pending Drug** – Covered drug that is subject to the SUPDL, but for which *preferred* or *non-preferred* status has yet to be assigned.
- **Neutral Drug** – Covered drug that is in a therapeutic class not included on the SUPDL. As such, the drug has neither *preferred* nor *non-preferred* status.
- **Line Extension Drug** – A new strength, formulation, or dosage form of a particular chemical entity for a given manufacturer that has been approved by the FDA. The SUPDL status of a line extension drug is the same as the status of the chemical entity to which it pertains unless otherwise determined by the DUR Board.

### **Prior Authorization (PA)**

This term is defined at 405 IAC 5-2-20. Any IHCP covered legend drug (including drugs that are or are not listed on the SUPDL) may require PA. Prior authorization is generally required in order to ensure appropriate drug utilization, conformance to established therapeutic guidelines, and fiscal reasonability.

Prior authorization request forms are located at <https://www.in.gov/medicaid/providers/index.html> under Pharmacy Services. Select "[PA Criteria and Administrative Forms](#)" under the "Quick Links" column on the right-hand margin. Drug specific PA criteria are attached to each associated drug class within the SUPDL document. Non-specific criteria are located at the end of the SUPDL document.

### **Mental Health Drugs**

In accordance with Indiana law, all antianxiety, antidepressant, antipsychotic, and "cross indicated" drugs are considered as being preferred. Drugs that are (1) classified in a central nervous system drug category or classification (according to *Drug Facts and Comparisons*) created after March 12, 2002, and (2) prescribed for the treatment of a mental illness (as defined by the most recent publication of the American Psychiatric Association's *Diagnostic and Statistical Manual of Mental Disorders*) are also considered as *preferred*. Please note that since these drugs/classes are *preferred*, they are not shown on the SUPDL document. **Lack of inclusion on the SUPDL does not mean these drugs are non-covered by the IHCP.** Click the following link for a list of utilization edits on mental health medications: [Utilization Edits for Mental Health Medications](#).

**Effective August 1, 2023 V1.1**

Inclusion or reference to any given drug does not indicate market availability of the drug. Drugs that will be, or have been, withdrawn from the market will be removed from the SUPDL as part of routine periodic updating of the SUPDL.
